

Fire Station Alert System Dorm / Responder Path LED Lighting

Subtle Red LED Lighting...

Subtle Red Low Voltage LED Lighting accompanying the ramp tone can make it easier to wake up to and find your way to the apparatus room.

The concept comes from the use of a red safelight by conventional photographic film developers. They provide enough light to see and navigate, in the alert application, enough light to wake up to until your eyes adjust to full lighting in the apparatus room.

Lighting comes on the moment the Alert is received. A preset timer will turn off the lighting unless extended by an appending or another alert.

Sample photos show lights installed over dorm room egresses and hallway path to the apparatus room.

Specifications

- Ceiling mount dimensions 7 inch Dia.
- Standard Operating Temperature 32°F to 120°F
- Humidity Range 10% to 93% non-condensing
- Operating Voltage Range 11 to 14 V (12 V nominal)
- Input terminal wire gauge 18 to 20 AWG
- Direct Mount To Ceiling or Clip to Ceiling T-Bar
