Modern Volume Control

- ◀ Mercury's High Presence Speaker Cluster offers high power, performance, bandwidth and sensitivity in a compact, full-range speaker system.
- ◀ Each Speaker in the cluster incorporates an 8" low-mid frequency woofer and 1" titanium-coated tweeter.
- ◀ This 6 speaker system is capable of providing clear vivid sound reproduction for large-space applications. Power settings are selected by a rear accessible multi-tap control for 70V/100V line distribution systems.
- ◀ The sound quality and frequency range of the amplified signal from any speaker system is dependant on the qualities of the originating sound signal.

Our most popular speaker products are shown. If you have a special requirement please ask your Mercury representative. The acoustic properties of any area to be alert sound equipped must be considered before selecting any speaker system! Please consult with your Mercury Systems Sales Engineer prior to ordering.
