

Fire Station Alert System Apparatus Room FSA “Count Up” or “Turnout” Timer

FSA Count Up Timer

The Mercury’s FSA Digital “Count-Up timer is designed to help your responder turnout time by indicating the actual time it takes from the initial alert to wheels out the door. This timer is usually mounted to the building structure inside the apparatus room in between the truck and ambulance doors. This timer is designed to integrate with Zetron Fire Station Alert Systems, the display includes polycarbonate lens, and standard mounting brackets. extended brackets are shown to straddle the large pipe in the photo below.
